THE MOTHER CALLS

By Daniel E. Doran
(Written for the Christmas Roll Call of the American Red Cross)

Who can hear a mother calling
And unheeding pass her by?
Who can hear her soft voice falling,
Hear her artless, pleading cry,
Know her heart is sad with grieving,
Know her eyes are filled with tears,
And go by her, unperceiving,
Down the weary, dreary years?

Listen, then, for she is calling,
Greatest Mother of the World,
She has seen the tear drops falling
Where her banners are unfurled,
She has heard her strong sons crying.
Yea, her noble sons and true,
She has seen them wounded, dying,
And this day she calls to you.

Aye, she calls, the Greatest Mother,
And her cry breaks on the heart,
With a sadness that no other
Half so poignant can impart;
Aye, she calls and you must hear her,
You must quell her doubt and fear,
Heed that call and draw ye near her,
Heed that cry and answer "Here!"

ADVICE TO "FLU" CONVALESCENTS

SPAIN AND ENGLAND REPORT INCREASE IN TUBERCULOSIS AFTER INFLUENZA EPIDEMIC.

U. S. Public Health Service Warns Public Against Tuberculosis. One Million Cases Tuberculosis in United States—Each a Source of Danger.

★★★★★★★★★★★★★★★★★★★★

Washington, D. C.—(Special.)—According to a report made to the United States Public Health Service, the epidemic of influenza in Spain has already caused an increase in the prevalence and deaths from pulmonary tuberculosis. A similar association between influenza and tuberculosis was recently made by Sir Arthur Newsholme, the chief medical officer of the English public health service, in his analysis of the tuberculosis death rate in England.

In order that the people of the United States may profit by the experience of other countries Surgeon General Rupert Blue of the United States Public Health Service has just issued a warning emphasizing the need of special precautions at the present time. "Experience seems to indicate," says the Surgeon General, "that persons whose resistance has been weakened by an attack of influenza are peculiarly susceptible to tuberculosis. With millions of its people recently affected with influenza this country now offers conditions favoring the spread of tuberculosis."

One Million Consumptives In the United States.

"Then you consider this a serious menace?" was asked. "In my opinion it is, though I hasten to add it is distinctly one against which the people can guard. So far as one can estimate there are at present about one million cases of tuberculosis in the United States. There is unfortunately no complete census available to show exactly the number of tuberculosis persons in each state despite the fact that most of the states have made the disease reportable. In New York city, where reporting has been in force for many years, over 35,000 cases of tuberculosis are registered with the Department of Health. Those familiar with the situation believe that the addition of unrecognized and unreported cases would make the number nearer 50,000. The very careful health survey conducted during the past two years in Framingham, Mass., revealed 200 cases of tuberculosis in a population of approximately 15,000. If these proportions hold true for the United States as a whole they would indicate that about one in every hundred persons is tuberculous. Each of these constitutes a source of danger to be guarded against."

What to Do.

In his statement to the public Surgeon General Blue points out how those who have had influenza should protect themselves against tuberculosis. "All who have recovered from influenza," says the Surgeon General, "should have their lungs carefully examined by a competent physician. In fact, it is desirable to have several examinations made a month apart. Such examinations cannot be made through the clothing nor can they be carried out in two or three minutes. If the lungs are found to be free from tuberculosis every effort should be made to keep them so. This can be done by right living, good food and plenty of fresh air."

Danger Signs.

The Surgeon General warned especially against certain danger signs, such as "decline" and "colds which hang on."

These, he explained, were often the beginning of tuberculosis. "If you do not get well promptly, if your cold seems to hang on or your health and strength decline, remember that these are often the early signs of tuberculosis. Place yourself at once under the care of a competent physician. Tuberculosis is curable in the early stages.

Patent Medicines Dangerous In Tuberculosis.

"Above all do not trust in the misleading statements of unscrupulous patent medicine fakers. There is no specific medicine for the cure of tuberculosis. The money spent on such medicines is thrown away; it should be spent instead for good food and decent living."

THE KIDDIES TO HAVE BIG TIME

Abbot Kinney to Entertain 5000 Kiddies at Venice Christmas

Every Saturday in the year is a Christmas Day for the kiddies of Venice, for Abbot Kinney donates his big dance pavilion and his wonderful orchestra for their entertainment. On Christmas day he extends his invitation to all the kiddies of the Southland, and not only treats them to an afternoon of continuous pleasure, but gives to each youngster, boy or girl, a gift from the big Christmas Tree to make glad the hearts of his favorites—the children of Southern California.

For one who has not attended the festivities at the Venice dance pavilion on Christmas Day, it has been a wonderful treat missed, for the magnificent floor rivals any picture you might conjure of fairyland with its thousands of kiddies in gala holiday attire enjoying with frank happiness the Christmas play, the rhythm of the dance and the many novelties put on for their especial pleasure. If you are looking for the unusual and the beautiful do not miss the Kiddies' Christmas at Venice in the afternoon from 2 p. m. to 5 p. m.

AT THE PALACE GRAND

As announced last week, the offering at the Palace Grand today is the great Northern play, "The Law of the North,", featuring Charles Ray.

For tomorrow, Sunday, December 22, the management has arranged for Mae Murray in "Danger—Go Slow." This is a picture of the remarkable adventures of a girl burglar. She keeps cellar for the gang, and when the place is raided she escapes. After two days in a box car she leaves the train at a little town in the Middle West. On the same program is a two-reel Henry Lehrmann Sunshine comedy, "A Neighbor's Keyhole."

Billie Burke, who has proved so popular both on the stage and on the screen, will be seen here next Monday in her latest and best picture, "The Make-Believe Wife." It is a comedy drama written by Edward Childs Carpenter. Pathe News pictures will be shown on the same program. Matinee at 2:30.

"The Lure of Luxury," a special Bluebird attraction, is on the program for Tuesday. The star of the picture, is Ruth Clifford, whom you will remember as the beautiful Belgian girl in "The Kaiser, the Beast of Berlin." This is a gripping story, dealing with the elements of heredity, love, money and human weaknesses. There will also be a Christie comedy, "Why Get a Divorce."

Enrico Caruso, the world-famous opera star, is the latest to go from that field into the pictures, and on next Wednesday, Christmas Day, he will be seen here in his first picture, "My Cousin." Caruso plays two parts in this surprising comedy drama, and we are told that he can act as well as he can sing. On the same program will be a Lyons Moran Comedy and a Bray pictograph and cartoon comedy. Holiday matinee at 2:30. Evening shows at 7:00 and 8:45.

Did you see "That Devil, Bateese?" If you did you will want to see Monroe Salisbury again, and you will have an opportunity next Thursday. This is another great French-Canadian picture, called "Hugon the Mighty." Also the official Allied War Review will be shown at that time.

For Friday, Deceember 27, we are promised the story of a never-ending honeymoon, featuring Madge Kennedy and Tom Moore in "The Kingdom of Youth." This is a great picture.

A program of unusual interest is promised for next Saturday. On that date will be presented "Mirandy Smiles," a great little comedy drama featuring Vivian Martin and Douglas MacLean. As a second attraction, Manager Jensen will present what he describes as the best two-reel comedy ever shown at the Palace Grand, entitled, "Her First Mistake." On the same program is "Chinese and African Workers Trailing the Hun," and also a Harold Lloyd comedy, "Why Pick on Me?" There will be a children's matinee at 2:30. Two evening shows, 6:45 and 8:45.

FOR STATE HISTORY

Local Board Requests Names and Photographs of Soldiers From This District

The Adjutant General of California has requested the Local Exemption Board to furnish his office with the names, the last known addresses, photographs if possible, and also with the names and addresses of different relatives, of all boys who have gone into military service from this district, regardless of whether they were rejected at camp or remained in service until the end of the war. This information is wanted by the State of California for the purpose of compiling a history of the part the state played in the great war.

The Board has the names and addresses of the boys who were drafted and sent by it to the various camps, but would appreciate photographs of these boys, if their friends or relatives will kindly supply them, as well as the names and addresses of their nearest relatives.

A great many boys from this district, however, enlisted through recruiting offices, and went into the service without any action on the part of the Board, and of such boys the Board has no record, and will appreciate it if their friends or relatives will furnish it with their names, addresses and photographs, as well as the names and addresses of their nearest relatives.

It is not probable that photographs can be returned, so nothing should be sent with the expectation of its coming back to you.

All information should be sent without delay to Local Exemption Board, City Hall, Glendale, Cal.

F. D. LANTERMAN,
Chairman.

U. S. HEALTH SERVICE ISSUES WARNING

Increase in All Respiratory Diseases After the Influenza Epidemic Probable.

Influenza Expected to Lurk for Months. How to Guard Against Pneumonia. Common Colds Highly Catching—Importance of Suitable Clothing—Could Save 100,000 Lives.

Washington, D. C.—With the subsidence of the epidemic of influenza the attention of health officers is directed to pneumonia, bronchitis and other diseases of the respiratory system which regularly cause a large number of deaths, especially during the winter season. According to Rupert Blue, Surgeon General of the United States Public Health Service, these diseases will be especially prevalent this winter unless the people are particularly careful to obey health instructions.

"The present epidemic," said Surgeon General Blue, "has taught by bitter experience how readily a condition beginning apparently as a slight cold may go on to pneumonia and death. Although the worst of the epidemic is over, there will continue to be a large number of scattered cases, many of them mild and unrecognized, which will be danger spots to be guarded against." The Surgeon General likened the present situation to that after a great fire, saying, "No fire chief who understands his business stops playing the hose on the charred debris as soon as the flames and visible fire have disappeared. On the contrary, he continues the water for hours and even days, for he knows that there is danger of the fire rekindling from smoldering embers."

"Then you fear another outbreak of influenza?" he was asked. "Not necessarily another large epidemic," said the Surgeon General, "but unless the people learn to realize the seriousness of the danger they will be compelled to pay a heavy death toll from pneumonia and other respiratory diseases.

Common Colds Highly Catching.

"It is encouraging to observe that people are beginning to learn that ordinary coughs and colds are highly catching and are spread from person to person by means of droplets of germ laden mucus. Such droplets are sprayed into the air when careless or ignorant people cough or sneeze without covering their mouth and nose. It is also good to know that people have learned something about the value of fresh air. In summer, when people are largely out of doors, the respiratory diseases (coughs, colds, pneumonia, etc.) are infrequent; in the fall, as people begin to remain indoors, the respiratory diseases increase; in the winter, when people are prone to stay in badly ventilated, overheated rooms, the respiratory diseases become very prevalent.

Suitable Clothing Important.

"Still another factor in the production of colds, pneumonia and other respiratory diseases is carelessness or ignorance of the people regarding suitable clothing during the seasons when the weather suddenly changes, sitting in warm rooms too heavily dressed or, what is even more common, especially among women, dressing so lightly that windows are kept closed in order to be comfortably warm. This is a very injurious practice.

Could Save 100,000 Lives.

"I believe we could easily save one hundred thousand lives annually in the United States if all the people would adopt the system of fresh air living followed, for example, in tuberculosis sanatoria. There is nothing mysterious about it—no specific medicine, no vaccine. The important thing is right living, good food and plenty of fresh air.
